

OUR FOUR FUNDAMENTAL QUALITY  
PILLARS - IDENTIFYING  
GLOBAL BEST-IN-CLASS BUSINESSES

## INVESTMENT OBJECTIVE

The investment objective of the Fund is to achieve long term growth in capital and income by developing a portfolio of equities and equity related instruments issued by or in connection with high quality listed companies from around the world.

## FUND COMMENTARY

The AI investment cycle remained a key structural driver of equity markets in June, as semiconductor exports surged. The main source for semiconductor market data, the WSTS, raised its prediction during the month to 90% growth in global semiconductor sales in 2026. This growth has been the key determinant of the exceptionally strong upwards revision in the next 12 months' earnings estimates for the global equity market.

The market, however, has started to exhibit some concern about the durability of this growth rate. Global equity markets peaked on 2 June, and cooled over the month, with a rotation away from technology and into defensive sectors towards the end of the month. This is favourable for the Fund's style of compounding, cash-generative, financially sustainable growth.

The best performers in the Fund in June were, as in May, companies which benefit from the growth of the semiconductor industry. Our two semiconductor equipment companies, ASML and KLA, were the strongest contributors to the Fund. Semiconductor equipment demand has proven historically to be much less cyclical than semiconductor demand. We expect these companies to be key beneficiaries of a bigger semiconductor industry, as the market they serve has enlarged, and they have strong and well-tested competitive positions. AJ Gallagher, an insurance broker, was a good contributor in the month – marking a reversal from its weakness earlier this year; and GE Aerospace, one of our engine turbine holdings (the other is Safran) performed well as the Strait of Hormuz re-opened and concerns lessened around international travel volumes through the Middle East.

Detractors in the month included Broadcom, where there is some concern that it is losing share to a competitor (we think as a function of capacity not ability, and therefore not a material concern); and Microsoft, which will have been impacted by reports that OpenAI is seeking to delay its IPO to next year. Microsoft has a stake in OpenAI, and OpenAI is a key contributor to Microsoft's AI cloud demand.

## FUND RATINGS<sup>2</sup>

## OUTCOME OF FAIR VALUE ASSESSMENTS (2025)

Our assessment confirms:

- The Fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- The Fund provides fair value to customers.

## INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term

## RISK PROFILE

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The Fund may enter into derivative agreements with counterparties, and consequently there is a risk that a counterparty may fail to meet its obligations. This may lead to delays in the Fund receiving amounts due to it, receiving less than is due or receiving nothing. As the Fund has exposure to overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease. The Fund invests in equity and equity related securities which are subject to various risks including fluctuations in market prices, adverse issuer or market information and the fact that equity and equity related securities are subordinate in the right of payment to other corporate securities, including debt securities. The value of equity securities varies with the performance of the respective issuers and movements in equity markets generally. As a result, the Fund may suffer losses if it invests in equity of issuers where performance falls below market expectations or if equity markets in general decline or the Fund has not hedged against such a general decline. The Fund may hold a relatively small number of stocks (approximately 20 to 30 positions) as compared to many other funds. This may make the Fund's performance more volatile than would be the case if it had a more diversified investment portfolio. For full details of the Fund's risks, please see the prospectus and supplement sections entitled 'Risk Factors'.
