PORTFOLIO COMMENTARY

The fund delivered a positive return over the month, broadly in line with the benchmark. Global equities advanced through January, while fixed income markets remained stable.

Within equities, Veritas Asia was the strongest contributor, supported by effective stock selection in technology. Positions such as TSMC and SK Hynix benefited from robust demand for AI-related memory and chip capacity. Driehaus also delivered strong results, aided by stock selection in energy, including Bloom Energy, which benefited from increased power-generation demand from data centres.

Within alternatives, both gold and CAT bonds continued their strong run. CAT bonds remained supported by the hurricane off-season, while gold advanced again amid ongoing macro uncertainty. In contrast, MV TOPS Focus had a weaker January, with short exposures to materials and energy acting as a headwind.

Portfolio activity included increasing the position in new manager, Artisan Global Value, while reductions were made in Driehaus, Man Undervalued Assets, the Xtrackers S&P 500 Equal Weight ETF and Polar Insurance.

INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term
