### Risk and Reward Profile

Lower risk ← Higher risk  
Typically lower rewards ← Typically higher rewards

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 5 because its volatility has been estimated as above average. The classification is based on estimated historical data of a relevant benchmark and may not be a reliable indicator of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund may enter into derivative agreements with counterparties, and consequently there is a risk that a counterparty may fail to meet its obligations. This may lead to delays in the Fund receiving amounts due to it, receiving less than is due or receiving nothing.

Investments in underlying funds contain the same market and liquidity risks associated with the underlying investments.

The Fund may be subject to a liquidity risk due to the manner and timing of potential redemptions from the underlying funds. Underlying funds may be entitled to delay acceptance of redemption requests or payment of redemption proceeds from the Fund.

The Fund may be subject to valuation risk due to the manner and timing of valuations of the Fund's investments.

**Sustainability Risk** - The Fund may be subject to sustainability risk, meaning an environmental, social or governance ("ESG") event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.

For full details of the Fund's risks, please see the prospectus and supplement sections entitled 'Risk Factors' which may be obtained from the address in 'Practical Information' overleaf.
