## INVESTMENT OBJECTIVE & POLICY

The Fund aims to achieve long-term capital growth. The Fund aims to invest in equities falling mainly under the following categories: smaller companies which offer long-term growth; companies which offer recovery prospects; and companies in sectors which are perceived to be unduly depressed. There is no geographical restriction but in practice the Fund will be mainly invested in the UK. \*

## FUND COMMENTARY

Economic news was positive during the month, supported by the short-term ceasefire between the US and Iran and hopes of a permanent peace agreement. Some traffic has resumed through the Strait of Hormuz, and the retreat in oil and gas prices is helpful. UK inflation held steady at 2.8%, down from 3.3% in March, prompting the Bank of England's Monetary Policy Committee to keep interest rates unchanged at 3.75%, with the 2% long-term target still achievable. Politically, Prime Minister Starmer's resignation was unsurprising, and Andy Burnham looks set to take over after winning the Makerfield by-election. A change of Chancellor appears inevitable, although indications suggest the current fiscal rules will remain in place. If so, the government will need to find funding for the £4.7 billion shortfall created by higher spending following the publication of the UK Defence Investment Plan.

We added to our recently acquired holding in ME Group International after share price overreacted to a profit downgrade on the back of an unexpected trading statement. An impact was seen from the Gulf War where its photo booth business was affected by fewer passport photos being required due to a decline in foreign travel. The self-service laundry business also experienced lower demand and fewer equipment sales. Other additions included C&C (drinks), Gulf Marine (support service vessels) and Kier (infrastructure) which carry attractive valuations. Reductions were made in several holdings which had outperformed. Looking ahead, it remains to be seen how the change in prime minister and cabinet changes will affect government policy, but the stock market does not show signs of concern, and we remain happy with prospects from the shares held in the portfolio.

**RISK PROFILE**

Class C, Class L, Class Y, Class B

The following risks are material:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

- The businesses and companies are subject to higher risk of failure and so the risk of insolvency is also higher for these type of shares. This could mean that you lose all or significantly large part of the investment is shares of companies which are insolvent.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## TM STONEHAGE FLEMING **OPPORTUNITIES FUND**

### INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are seeking capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The Fund is unlikely to be appropriate for those who:

Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return

- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term

### IMPORTANT INFORMATION

This is a marketing communication issued by Stonehage Fleming Investment Management Limited (SFIM). SFIM is the Investment Manager of the Fund, authorised and regulated in the UK by the Financial Conduct Authority (FRN. 194382). The distribution or possession of this document in jurisdictions outside the United Kingdom may be restricted by law or other regulatory requirements. For details of the Funds investment policy, please see the Investment Objective and Policy section of the Fund Prospectus Document.

All investments risk the loss of capital. No guarantee or representation is made that the fund will achieve its investment objective. The value of investments may go down as well as up. For products designed to return income, the distributions can also go down or up and you may not receive back the full value of your initial investment. Derivatives have not been used but are allowed if appropriate for efficient asset management. The Fund only invests in UK assets but is allowed to hold shares on overseas exchanges. This would occur in the event of a company delisting from the London stock market and would not be expected to be material. Hence, there would be limited foreign exchange risk. Past performance is not a guide to future returns. If the information is not displayed in your base currency, then the return may increase or decrease due to currency fluctuations.
