GLOBAL BEST IDEAS EQUITY FEEDER FUND

OUR FOUR
FUNDAMENTAL
QUALITY PILLARS -
IDENTIFYING
GLOBAL BEST OF
BREED BUSINESSES

INVESTMENT OBJECTIVE

The Fund is a feeder fund investing only in the Stonehage Fleming Global Best Ideas Equity Fund ("Master Fund"), managed by Stonehage Fleming Investment Management Limited in the United Kingdom. The Master Fund seeks to achieve long-term growth in capital and income in a focused portfolio of high quality listed businesses from around the world.

INVESTMENT PHILOSOPHY

We invest in best of breed businesses for their quality, strategic competitive edge and value.

FUND COMMENTARY

This year started with the weakest S&P 500 performance in January since the Financial Crisis. It seems to have been triggered by the release of the December Federal Reserve minutes that showed more hawkish members than expected. The three main areas that investors are focusing on are:

- Uncertainty whether the current high inflation levels are relatively short-term, or structural in nature.
- Uncertainty about potential Central Bank actions to curb the inflation risks.
- Elevated geopolitical risks with fear of Russia potentially invading Ukraine.

Our perception is that inflation may remain high for another few months, but that it may start easing by the second half of the year, with supply becoming more able to satisfy demand. We expect inflation levels to stay above Central Bank targets, but easing investor fears somewhat.

As is often the case at the beginning of a new tightening cycle, the market may again be skeptical about Central Bank actions and misinterpret them as being too little and/or too late.

On the geopolitical front, the potential impact on the stock market is of course a function of the particular event. Historically, the market often dropped before the event and ended the following twelve months in positive territory.

Under such uncertain and volatile circumstances, the market has again rotated away from sustainable growth businesses towards low valued shares with less de-rating risk. Such rotations often happen, with the most recent example during the last months in 2020 and early 2021. In recent history, such rotations did not last for long.

We expect a further gradual process of de-rating of equities, the extent to which may depend on the future level of interest rates. We remain invested in businesses with strong and growing free cash flow, with their growth levels being able to offset lower valuation multiples. The current market volatility offers good strategic investment opportunities in this context.

1 For periods longer than one year, returns are annualised. Source for all performance is Sanlam Collective Investments, Bloomberg, Financial Express, MSCI and Stonehage Fleming Equity Management as at 31/01/2022. Third parties (including Bloomberg and Financial Express) whose data may be included in this document do not accept any liability for errors or omissions.

2 Fund Inception Date: 1 November 2018.

3 These are the highest or lowest consecutive 12-month returns over a 10 year period (or since inception where the performance history does not exist for 10 years). This is a measure of how much the Fund's returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 31 January 2020 and The Fund's lowest annual return occurred during the 12 months ended 31 May 2021.

Total Investment Charges (TIC)	1.26%

¹ Advice fees are negotiable between the client and their adviser. Annual advice fees are paid through a re-purchase of units from the investor. The fund is available through certain LIPs which levy their own fees. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The TER displayed, which is calculated using data for the period 1 November 2018 to 30 September 2021, is based on the ASISA methodology, is higher than the expected TER of the fund due to the high weight allocated to past costs prior to the increase in fund size. The estimated actual TER payable by a client investing into the fund today would be 1.04%. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. Disclosed performance information is calculated after all fees and costs deducted. ² All fees inclusive of VAT where applicable.

Independent professional financial advice should always be sought before making an investment decision.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performances are not necessarily a guide to future performances, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) Pty Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of

charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. Source: Money Mate. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund invests in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
