MORNINGSTAR

INVESTMENT OBJECTIVE

To achieve long-term growth in capital and income in a focused portfolio of high quality listed businesses from around the world.

INVESTMENT PHILOSOPHY

We invest in best of breed businesses for their quality, strategic competitive edge and value.

PERFORMANCE DISCLOSURE

Past performance is not a guide to future performance. The value of investments can fall. Investors may not get back the amount invested. Income from investments may vary and is not guaranteed. The return may increase or decrease due to currency fluctuations. Performance figures are net of fees and charges. The Fund may hold a relatively small number of stocks as compared to many other funds. This may make the Fund's performance more volatile than would be the case if it had a more diversified investment portfolio. For a full list of risks applicable to this fund, please refer to the Prospectus.

FUND COMMENTARY

Many investors are surprised by the strong performance from the equity markets this year – especially those who took fright towards the end of last year and opted for the proverbial side-lines. We were clear on our views at the time.

A frequent error some make in commenting on performance is by considering data points versus preceding trough levels. We are of the opinion that one should also consider performance levels against preceding peak levels. In this context, interestingly, the MSCI World AC index (\$-terms) has grown +32.3% p.a. since its trough level during the Credit Crisis, whilst its growth since the preceding peak level has been only +1.8% p.a. (respectively +15.6% p.a. and +5.6% p.a. for the S&P 500 index). In terms of the short term experience, the MSCI World AC index is up +20.3% since its December 2018 trough, but still -4.6% lower than its January 2018 peak (+25.3% since the December trough for the S&P 500, and by just +0.5% surpassing its September 2018 peak). From a technical point of view, these numbers do not yet reflect a structurally overheated equity market.

There are a number of fundamental issues that have changed over the past quarter. Leading US economic indicators have started rolling over in the fourth quarter of last year, but have since stabilised at constructive levels. Inflation levels and interest rates remain lower than many feared a few months ago. The US yield curve has not inverted as many feared it may do, and has actually stabilised in constructive territory. Both US and China economic growth in the first quarter exceeded expectations. Whilst expectations for continuing economic expansion have been tempered, the outlook for continuing earnings growth for quality businesses remains on course.

The dull but constructive economic outlook allays many fears around excessive volatility in the capital markets. A conclusion on the Sino-US trade negotiations may also be appreciated.

INVESTMENT STRATEGY

- Invest for sustainable growth
- Fundamental research driven
- Particular focus on quality of management, balance sheet strength, return on invested capital, free cash flow, ability to grow dividends each year
- Bottom-up approach to identify exceptional businesses
- Global orientation, with emerging market exposure
- High conviction concentrated portfolio
- Predominantly larger capitalisation businesses, also consider exceptional medium-sized ones
- Buy to hold and disciplined selling
- No benchmark orientation, no active trading, no leverage, no hedging
