

**OUR FOUR FUNDAMENTAL QUALITY PILLARS - IDENTIFYING GLOBAL BEST OF BREED BUSINESSES**

**INVESTMENT OBJECTIVE**

To achieve long-term growth in capital and income in a focused portfolio of high quality listed businesses from around the world.

**INVESTMENT PHILOSOPHY**

We invest in best of breed businesses for their quality, strategic competitive edge and value.

**PERFORMANCE DISCLOSURE**

Simulated past performance and past performance is not a guide to future performance. The value of investments can fall. Investors may not get back the amount invested. Income from investments may vary and is not guaranteed. The return may increase or decrease due to currency fluctuations. Performance figures are net of fees and charges. The Fund may hold a relatively small number of stocks as compared to many other funds. This may make the Fund's performance more volatile than would be the case if it had a more diversified investment portfolio. For a full list of risks applicable to this fund, please refer to the Prospectus.

**FUND COMMENTARY**

Investors are often caught off-guard with their currency positioning. Few, probably, would have thought at the beginning of this year that Sterling would be stronger than both the Dollar and the Euro, and may have taken incorrect positions in this context.

We do not claim any particular expertise in forecasting currency movements. In fact, we have not come across anyone who successfully projects currencies on a consistent basis.

Part of our investment strategy is to invest globally for sustainable organic growth. For us it is first and foremost about the quality of the particular business and its ability to continue delivering. We prefer to invest in businesses that operate globally and that also have meaningful exposure to Emerging Markets. We believe this approach offers three main benefits:

- It provides balanced exposure to all the major currencies. We therefore do not need to take particular currency views by making difficult decisions on poor information.
- We get exposure to the organic growth in Emerging Markets without the capital market and currency volatilities of those markets.
- We do not need to lower our quality standards to get exposure to the higher organic growth in Emerging Markets (at times in the context of management and governance issues).

Despite the fact that 72% of the total value of our investments are in US listed businesses, our direct exposure to the Dollar is much lower at 46%\*. Our Euro exposure is 18%\* and 32%\* is in Emerging Markets (of which about two-thirds are to Asia).

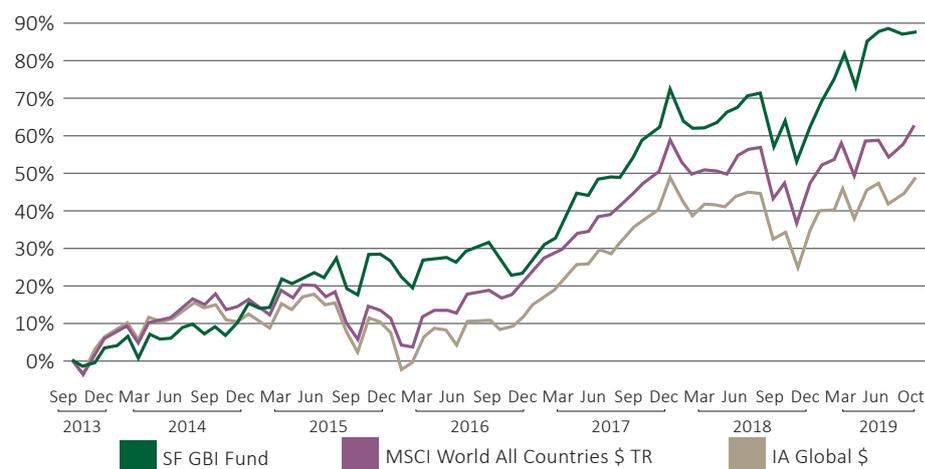

Businesses like Estée Lauder and Nike experience high organic growth in Asia and particularly in China, while their shares perform well in Dollar terms. Nestlé's shares perform well in Swiss Francs, with around 40%\* of their business originating in Emerging Markets. In summary, we consider equities to be one of the best asset classes to obtain a well-spread currency exposure.

\* estimate

**INVESTMENT STRATEGY**

- Invest for sustainable growth
- Fundamental research driven
- Particular focus on quality of management, balance sheet strength, return on invested capital, free cash flow, ability to grow dividends each year
- Bottom-up approach to identify exceptional businesses
- Global orientation, with emerging market exposure
- High conviction concentrated portfolio
- Predominantly larger capitalisation businesses, also consider exceptional medium-sized ones
- Buy to hold and disciplined selling
- No benchmark orientation, no active trading, no leverage, no hedging
