INVESTMENT OBJECTIVE

The Fund aims to achieve capital growth over the longer term by investing in companies that are progressively becoming more sustainable therefore creating a portfolio that is aligned to the UN Sustainable Development Goals**.

MANAGER PERFORMANCE HIGHLIGHTS

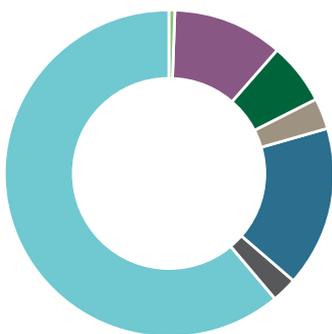

The Fund fell marginally during Q2, but absolute returns for the year remain positive. It was quite a mixed period for equity markets as most of the underlying sectors of the market were negative, but a few areas such as technology companies performed well.

As we saw in the first quarter of the year, it was the more impact-focused managers that delivered the lower returns. One of the challenges they have faced is their investable universe tends to not include US large cap technology companies, who have seen strong earnings upgrades, and have benefitted from the general hype around AI. We do not preclude these types of investments within the Fund as we recognise some of the attractive investment opportunities on offer with limited negative externalities. In fact, it is one of the reasons we have opted for a blended approach and include managers who are leaders in incorporating environmental, social and governance factors, and have a wider investable universe. An example of this is Schroder Global Sustainable Growth Fund, who will invest in responsible technology companies, such as Taiwan Semiconductor Manufacturing Company (TSMC) - one of the key foundries that manufacture NVIDIA GPUs and has performed exceptionally well this year.

Some of the activity over the period also reflects an effort to gain more exposure to these areas whilst not compromising on the sustainable characteristics of the strategy. These include the introduction of the Amundi S&P 500 Climate Net Zero Ambition ETF – a sophisticated ESG ETF which incorporates climate data for a company today as well as forward-looking estimates. We also view Amundi as being one of the leaders in ETF responsible investing, which is evidenced by high voting participation on environmental and social matters.

OUTCOME OF FAIR VALUE ASSESSMENTS (2023)

Our assessment confirms:

- The fund meets the needs of the target market.
- The intended distribution strategy remains appropriate.
- The fund provides fair value to customers.

INVESTOR PROFILE

The fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are looking for capital growth. Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term
