## PORTFOLIO MANAGER PERFORMANCE

## PORTFOLIO COMMENTARY

**The Global Balanced Portfolio returned 0.1% in August, taking 2024 returns to 6.8% so far.**

Inflationary pressures continued to ease in August, while the labour market remained robust, with low unemployment rates and moderating wage growth. There were continued signs of weakness in manufacturing, which added to the uncertainty. Jerome Powell, the Chair of the Federal Reserve, stated that the economy was now ready for lower interest rates, raising expectations that the cutting cycle would begin in September.

The equity portfolio posted positive returns and we saw particularly strong returns from our specialist managers; Polar Global Insurance and Sector Healthcare Value, which both tend to offer more defensive earnings streams. Smaller companies underperformed their regions, which included Dimensional Global Targeted Value and Driehaus US Small Cap. In Fixed Income, PIMCO Income had another positive month, benefitting from stable credit markets and falling bond yields.

**INVESTOR PROFILE**

The fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth.

Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long term
