## PORTFOLIO MANAGER PERFORMANCE

## PORTFOLIO COMMENTARY

The Global Balanced Portfolio returned 3.2% in November, taking 2024 returns to 11.1% so far.

November began with the US election and Trump's victory reignited hopes for continued American exceptionalism, driving the market higher. On the economic front, the labour market and inflation continued to cool, prompting the Federal Reserve to cut rates by 0.25% in early November. Similarly, in Europe, inflation continued its downward trajectory but political uncertainty intensified with the collapse of the German coalition and the threats for a government collapse in France.

Among equities, notable outperformers included Polar Insurance, which benefitted from strong selection. Relative to global markets, our US small cap strategy posted strong returns following positive sentiment in Semtech and Axon Enterprise while Dimensional also benefitted from positive stock selection in Financials and Consumer Durables. The largest weighting in the equity book, Stonehage Fleming Global Best Ideas outperformed its benchmark driven by strong stock selection in Technology services, which included the likes of Cadence Design Systems. November saw developed market yields move lower, reversing some of the move wider in yields seen in late September and October. Credit spreads also tightened on the month, taking spreads to the lowest levels seen post Covid in 2020.

## INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds, it is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and looking for capital growth.

Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long-term investment. Investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The Fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the fund
- Do not intend to invest for the long-term

## RISK PROFILE

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- Credit risk is the risk of loss stemming from a borrower's failure to repay the loan or meet its contractual obligation.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.
